

National Congress of Space Renaissance Italia

May 8th 9th 2014 - Politecnico of Milano Bovisa

SPACE WITHOUT FRONTIERS: A GREATER WORLD IS POSSIBLE!

www.spacerenaissance.it

Italy, home of Humanism and of the first Renaissance, is among the leading actors of the Civilian Astronautics and Space Tourism development.

Imminent projection of human activities in Geo-Lunar space is primary choice for the continuation of Civilization, facing the catastrophic dilemmas of demographic and natural resources forecasts.

To open the Space Frontier to privates, supporting the downsizing of costs to orbit, and determining the conditions for the use of the "Fourth Environment of Man".

To liberate the energies of the Space Renaissance, a new engine of industrial, economic and cultural development, to which we call scientists, engineers, humanists, artists, philosophers, writers, lawyers and citizens to compete.

The conference will be an opportunity to discuss the projects of Space Renaissance Italia, to propose other ideas and considerations and to discuss our future together.

You are kindly invited to submit abstracts (www.spacerenaissance.it/call-for-papers/) on technological, filosofical, etical, cultural, social topics to papers@spacerenaissance.it **within March 14th 2014.**
